

Rotaract Club of Baku

On April 3rd, 2010, the Rotaract Club of Baku held a conference to announce the upcoming Eye Treatment Project of Mine Victims. The principle aim of the project is to provide treatment for people who have suffered serious eyes injuries from exploding mines. The project is gathering momentum, thanks to both administrative and financial support from the Rotaract clubs of German District #1930, Ex-mine, and RCB. The objective is to give aid to more than 100 people throughout the period of 1 year. We are also fortunately supported by ANAMA, who are assisting us with finding these victims.

In attendance was the President of the Rotary International, Lutful Kabir, President of RCB, Agamurad Muradov, International Committee Chairperson, Ayten Sadigova, and representatives of the Caspian Compassion Project clinic and ANAMA, who all participated. After the conference had concluded, vouchers were distributed among the mine victims who had participated at the conference. These vouchers will enable them to receive the necessary treatment at the CCP clinic, free of charge. For further information on this project, please go to the website at: www.rotaract.az
